**SHORT HANDLE WIRE BRUSH FROM PURDY® EARNES
HANDYMAN CLUB OF AMERICA'S MEMBER-RECOMMENDED
SEAL OF APPROVAL**

CLEVELAND – Purdy® is pleased to announce the company's Short Handle Wire Brush earned the Handyman Club of America's official Member Tested & Recommended Seal of Approval, powered by StuffStuff.com. After thorough testing and evaluation, Handyman Club of America testers gave the product a unanimous 100 percent approval rating.

Products tested by Handyman Club of America members are evaluated on criteria including performance, quality, design, ease of use, and then are compared to similar products. Six hundred eighty members tested the Short Handle Wire Brush and completed surveys assessing their overall experience with the product. The testers rated handle comfort as the Short Handle Wire Brush's best feature. They were also impressed with the product's ergonomic design, usability and versatility.

"The Purdy wire brush is very comfortable to hold and has the ability to use both hands to really apply some pressure," said tester Orlin Clements.

"The handle design helped prevent my knuckles from getting scraped when using," added tester Robert Overstreet. "This has been a problem with other wire brushes I've used. I also was impressed with the bristles strength after using the brush to prep an old boat trailer for painting."

The Short Handle Wire Brush is a pistol-grip style brush with a unique patent-pending, criss-cross bristle pattern that removes paint up to two times faster. The brush handle allows for multiple grip positions for less fatigue.

Purdy's Short Handle Wire Brush is available at fine paint stores and hardware retailers. For more information about Purdy, the Short Handle Wire Brush or other fine Purdy products, please visit www.purdy.com.
